Correct Answer : sleep medications

66 : _____ is translated from the Greek words meaning “no” and “breath.”

Correct Answer : Apnea

ESSAY

67 : What are the characteristics of an emotionally healthy person? What are the characteristics of a mentally healthy person?

Correct Answer : Characteristics of an emotionally healthy person include a determination and effort to be healthy, flexibility and adaptability, a sense of meaning and affirmation in life, compassion for others, unselfishness in serving and relating to others, increased depth and satisfaction in intimate relationships, and a sense of control over mind and body. Characteristics of a mentally healthy person include an ability to function and carry out responsibilities; an ability to form relationships; realistic perceptions of the motivations of others; rational, logical thought processes; and an ability to adapt to change and cope with adversity.

68 : As it relates to happiness, discuss three major factors that contribute to a sense of well-being (our “roots of happiness”)?

Correct Answer : Psychological research has identified three major factors that contribute to a sense of well-being:• A happiness set point, which is a genetic component that contributes about 50 percent to individual differences in contentment• Life circumstances, such as income or marital status, which account for about 10 percent of the happiness differential• Thoughts, behaviors, beliefs, and goal-based activities, which may account for up to 40 percent of individual variations

69 : Discuss why being assertive works to effect the change you want, whereas being either aggressive or passive does not.

Correct Answer : Being assertive requires recognizing your feelings and making your needs and desires clear to others. Unlike aggression, a far less healthy means of expression, assertiveness usually works. You can change a situation you don't like by communicating your feelings and thoughts in nonprovocative words, by focusing on specifics, and by making sure you're talking with the person directly responsible. Many people have learned to cope by being passive and not communicating their feelings or opinions. Sooner or later they become so irritated, frustrated, or overwhelmed that they explode in an outburst—which they think of as being assertive. However, such behavior is so distasteful to them that they'd rather be passive. But assertiveness doesn't mean screaming or telling someone off. You can communicate your wishes calmly and clearly. Assertiveness is a behavior that respects your rights and the rights of other people even when you disagree.

70 : List and provide examples of six simple steps you can take to enrich your spiritual life, whether you are religious or not.

Correct Answer : The following simple steps can start you on an inner journey to a new level of understanding:• Sit quietly: Force yourself to do nothing at all.• Start small: Shut the door to your room, take a few huge deep breaths, and let them out slowly.• Step outside: Follow the flight of a bird; watch clouds float overhead.• Use activity to tune into your spirit: Sing, chant, dance, or drum.• Ask questions of yourself: What am I feeling? What are my choices? Where am I heading?• Trust your spirit: Reach for the greater good by calling or emailing a friend with whom you've lost touch.Additional step that might be listed:• Develop a spiritual practice: Deepen your current spiritual commitment, be open-minded about religion, or try nonreligious meditation.

71 : What approaches are part of cognitive-behavioral therapy, which is used as a first-line therapy for chronic insomnia?

Correct Answer : • Education about sleep hygiene and good sleep habits• Sleep restriction (limiting time in bed to consolidate sleep)• Stimulus control (eliminating distractions and creating a soothing sleep environment)
