198. Discuss the hierarchical structure of typical business organizations.

Answer: At the highest levels of business organizations, we find the board of directors whose members are elected by stockholders to represent their ownership interests. In nonprofit organizations such as a hospital or university, this level is often called a board of trustees, and it may be elected by local citizens, appointed by government bodies, or invited by existing members.

The top managers including the chief executive officer (CEO), chief operating officer (COO), chief financial officer (CFO), chief information officer (CIO), chief diversity officer (CDO), president, and vice president constitute an executive team that reports to the board and is responsible for the performance of an organization as a whole or for one of its larger parts.

Middle managers report to top managers and are in charge of relatively large departments or divisions consisting of several smaller work units. Examples are clinic directors in hospitals; deans in universities; and division managers, plant managers, and regional sales managers in businesses. Middle managers work with top managers, coordinate with peers, and support lower levels to develop and pursue action plans that implement organizational strategies to accomplish key objectives.

Team leaders report to middle managers and supervise nonmanagerial workers.

199. Briefly explain the four management functions.

Answer: The four functions of management in what is called the management process are—planning, organizing, leading, and controlling.

Planning is the process of setting performance objectives and determining what actions should be taken to accomplish them. Through planning, a manager identifies desired results and ways to achieve them.

Organizing is the process of assigning tasks, allocating resources, and coordinating work activities.

Leading is the process of arousing enthusiasm and inspiring efforts to achieve goals.

Controlling is the process of measuring performance and taking action to ensure desired results.

200. Discuss the various roles performed by a manager.

Answer: The managerial roles fall into three categories—informational, interpersonal, and decisional roles.

A manager's informational roles involve the giving, receiving, and analyzing of information. A manager fulfilling these roles will be a monitor, scanning for information; a disseminator, sharing information; and a spokesperson, acting as official communicator. The interpersonal roles involve interactions with people inside and outside the work unit. A manager fulfilling these roles will be a figurehead, modeling and setting forth key principles and policies; a leader, providing direction and instilling enthusiasm; and a liaison, coordinating with others. The decisional roles involve using information to make decisions to solve problems or address opportunities. A manager fulfilling these roles will be a disturbance handler, dealing with problems and conflicts; a resource allocator, handling budgets and distributing resources; a negotiator, making deals and forging agreements; and an entrepreneur, developing new initiatives.
