Chapter: Chapter 01 - Testbank

Multiple Choice

1. Nutrition education and health promotion are related in the following ways, *except*:

- A) nutrition education includes other food issues besides health impacts.
- B) health promotion focuses on other issues besides food issues.
- C) health promotion is a subset of nutrition education.
- D) nutrition education can focus on increasing availability and accessibility of food.

Ans: C

Complexity: Moderate

Ahead: The Challenge of Educating People About Eating Well

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

2. This book focuses on the tasks of the vast majority of nutrition educators, which does *not* include which of the following?

- A) Engaging in activities and coalitions with others to support the public's ability to eat healthfully
- B) Developing accompanying materials and activities
- C) Providing site-based, in-person educational activities with groups
- D) Working in a lab pipetting blood samples

Ans: D

Complexity: Moderate

Ahead: What Do Nutrition Educators Do? Settings, Audiences, and Scope for Nutrition Education

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

3. Nutrition education involves a combination of educational strategies. These could include all the following, *except*:

- A) policy activities related to food and nutrition.
- B) participation in coalitions to change the food environment.
- C) strategies to foster growth, development, and change.
- D) changes in food assistance programs administration.

Ans: D

Complexity: Moderate

Ahead: A Contemporary Definition of Nutrition Education

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

4. Nutrition education for the public can include all of the following, *except*:

- A) engaging in food policy activities.
- B) discouraging people from eating for reasons other than health if they so choose.
- C) enhancing motivation.
- D) assisting people to take food or nutrition-related action.

Ans: B

Complexity: Moderate

Ahead: A Contemporary Definition of Nutrition Education

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

5. Dietary interventions are often integrated with interventions directed at the following other health-related behaviors, *except*:

- A) increased physical activity.
- B) smoking cessation.
- C) blood pressure control.
- D) computer programming skills.

Ans: D

Complexity: Moderate

Ahead: Why Nutrition Education?

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

6. Which of the following is *not* a life-stage group?

- A) College students
- B) Asian Americans
- C) Pregnant and lactating women
- D) Preschool children

Ans: B

Complexity: Easy

Ahead: What Do Nutrition Educators Do? Settings, Audiences, and Scope for Nutrition Education

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

7. With respect to an elementary school child, the term *gatekeepers* likely refers to all of the following, *except*:

- A) the Supplemental Food and Nutrition Program (SNAP).
- B) a child's mother who purchases and prepares food.
- C) the child's twin sister.
- D) the foodservice manager at the child's school.

Ans: C

Complexity: Moderate

Ahead: What Do Nutrition Educators Do? Settings, Audiences, and Scope for Nutrition Education

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

8. What is the name of the diet-related governmental document that provides recommendations for implementing national strategies to improve health and reduce disease?

- A) Dietary Guidelines for Americans
- B) Food Guide Pyramid
- C) MyPlate
- D) The National Guidelines

Ans: A

Complexity: Easy

Ahead: The Challenge of Educating People About Eating Well

Title: Nutrition Education for Today's Complex World

4. Making healthier options more attractive, convenient, and normative to nudge people to eat the healthier options is an example of _____.

Ans: behavioral economics

Complexity: Moderate

Ahead: The Challenge of Educating People About Eating Well

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

Essay

1. Explain the term "sensory-specific satiety."

Ans: As people eat more of a particular food (e.g., salty food) in the course of a meal, they come to like its taste less but the desire for other foods offered (e.g., sweet desserts) remains relatively unchanged. This is sensory-specific satiety. This biological predisposition ensured that humans would consume a varied diet, and when the varied diet was from whole, ancestral foods, it ensured individuals would get all the nutrients they needed.

Complexity: Difficult

Ahead: The Challenge of Educating People About Eating Well

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

2. Name four different settings where nutrition education is provided.

Ans: Nutrition education is provided in: community settings, such as at WIC centers or Head Start programs; food and food-system-related community sites such as food banks and soup kitchens; schools; workplaces; healthcare settings.

Complexity: Moderate

Ahead: What Do Nutrition Educators Do? Settings, Audiences, and Scope for Nutrition Education

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

3. Name at least three diseases that are associated with current eating patterns.

Ans: 1. Coronary heart disease; 2. Some types of cancer; 3. Type 2 diabetes; 4. Osteoporosis

Complexity: Moderate

Ahead: Introduction

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

4. Name at least three reasons why nutrition education is needed.

Ans: Nutrition education is currently needed because: Dietary patterns are not optimal; there is a complex food choice environment; there is a complex information environment; there is consumer bewilderment and concern; individuals are often not motivated to select healthy food.

Complexity: Moderate

Ahead: Why Nutrition Education?

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

5. Describe three key features of the definition of nutrition education.

Ans: 1. Nutrition education focuses on the adoption of specific behaviors or actions; 2. Its role is to facilitate the voluntary adoption of healthful food choices and diet-related behaviors; 3. It includes activities at multiple levels—individual, community, and policy levels; 4. The activities are systematically planned.

Complexity: Moderate

Ahead: A Contemporary Definition of Nutrition Education

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

6. Eating habits intertwine biological preferences and cultural influences. What are the major cultural influences on today's U.S. eating patterns?

Ans: Major cultural influences include: The importance of convenience or quickness in preparing or obtaining food; the importance of buying low-cost food; foods products available are highly processed; food products are highly promoted by the instruments of mass culture (television, advertising).

Complexity: Difficult

Ahead: The Challenge of Educating People About Eating Well

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

7. What advice can nutrition educators give parents and caregivers about helping children learn to self-regulate the amount of food they eat?

Ans: Provide a variety of healthful foods from which children may choose; children choose how much of that food to eat; offer healthful foods frequently to increase familiarity; offer healthful foods in a positive social atmosphere

Complexity: Moderate

Ahead: The Challenge of Educating People About Eating Well

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

8. Describe three environmental factors that influence people's food choices and dietary practices. For each, state one implication for nutrition education.

Ans: Food environment: nutrition educators can help parents create a healthful food environment for their children at home; advocate for availability and accessibility of healthful foods in such places as workplaces and schools; Economic environment: Understand the importance of realistic recommendations that take into account people's budgets; Information environment: Help people analyze specific media /information environments; use media.

Complexity: Difficult

Ahead: The Challenge of Educating People About Eating Well

Subject: Chapter 1

Title: Nutrition Education for Today's Complex World

9. Individuals with limited resources often buy processed foods with added fat and sugar rather than fruits and vegetables because they are cheaper. Provide at least one reason why processed foods may be cheaper.

Ans: They are cheaper to *manufacture and transport*; they are cheaper to *store* than perishable items such as meat, dairy and fresh produce; *agricultural subsidies* make foods with added fat and sugar cheaper than fresh produce. Thus, a diet with refined grains can be had for about \$2 a day; animal protein foods can be 5 to 50 times higher in price per calorie; and fruits and vegetables 50 to 100 times higher per calorie.

Complexity: Moderate
